MARCIN ŁĘTOWSKI

WEB3 DEVELOPER

I am a skilled Web3 developer actively seeking a full-time position within the field of blockchain technology and decentralized applications. With a deep understanding of the principles and frameworks that power the decentralized web. My goal is to leverage my knowledge and skills in Web3 development to drive continuous improvement and create impactful solutions in this rapidly evolving industry.

SKILLS

- Solidity Programming: Proficient in writing and debugging smart contracts using Solidity, the programming language for Ethereum and other blockchain platforms.
- Ethereum Ecosystem: In-depth understanding of the Ethereum blockchain, including its architecture, consensus mechanisms, and transaction lifecycle.
- Smart Contract Development: Experience in designing, developing, and deploying secure and efficient smart contracts on Ethereum and other compatible blockchains.
- Token Standards: Knowledge of popular token standards like ERC-20, ERC-721, and ERC-1155, along with their implementation and usage in smart contracts.
- Web3 Infrastructure: Proficient in utilizing tools and frameworks like Hardhat, Remix, Ganache,Alchemy and Infura for smart contract development, testing, and deployment.
- Wallet Integration: Ability to integrate and interact with popular Ethereum wallets, such as MetaMask, for seamless user experiences within DApps.
- Cryptography: Familiarity with cryptographic algorithms, digital signatures, encryption, and secure key management within the context of blockchain technology.
- Version Control Systems: Proficient in using Git and GitHub for collaborative development, code versioning, and repository management.
- Account Abstraction: Proficient understanding of account abstraction in blockchain technology, including its principles and practical implementation. Familiarity with the concept of abstracting away gas fees and enabling contracts to pay for transaction costs on behalf of users. Knowledge about modifying smart contract code to incorporate account abstraction functionality and enhance user experience.

EXPERIENCE

CREATED SMART CONTRACTS AND PROJECTS AVAILABLE ON GIT HUB

https://github.com/Xardesso

TWO-WEEK INTERNSHIP AT SMURFIT KAPPA

Smurfit Kappa 10.03.2023-10.14.2023

I participated in an internship at Smurfit Kappa as a programmer. During the internship, I created a website for storing IT equipment. Logging into this website was done by checking the Windows user account of the person attempting to log in.

EDUCATION

TECHNICAL COLLEGE STUDENT IN THE SPECIALIZATION OF PROGRAMMING (2020/2021-2024/2025)

Successfully passed Ethereum and Solidity Complete development course
https://www.udemy.com/certificate/UC-37dd1d4c-3fb6-42a8-b593-5975461210e5/
Successfully passed Certificate of Introduction to Databases, which was based on SQL language and confirms that I have successfully completed the course.
Successfully Passed CEFR exam on level C2 PROFICIENT
https://www.efset.org/cert/CJ4UdH
